NUA 8609A-G00-5.0

Convert paper forms to digital, design from scratch and manage the data collection digitally with no programming experience. Its versatility enables you to implement a forms process using PDF, HTML, RTF or our own intelligent OFM format.

Form data is automatically filled from previously entered data, digital signatures are supported, attachments can be added, and calculations, field validations are automatic. Databases are automatically created for each form for easy data analysis. Data can be exported to ODBC compliant databases such as MS Access and Oracle. OmniForm Premium is the best way to stop filling forms by hand and re-keying form data.

OmniForm Premium 5.0 benefits everyone in your organization.Form designers, those who distribute forms, everyone who fill out forms, and anyone who processes form data all stand to benefit greatly from OmniForm Premium.

- Benefits for Form Designers
- Benefits for Form Originators
- Benefits for Form Recipients
- Benefits for Data Processors

SPEECH RECOGNITION WARE

What is Transcription AID®?

Transcription AID is a new software program designed to be used with a Digital Voice Recorder, USB Microphone and Dragon NaturallySpeaking® software package. This work flow offers the Transcriptionists a traditional way of transcribing by using a foot control, headset and software.

How does it work?

Users dictate using a USB Microphone or Digital Voice Recorder in a .Wav format. Dragon NaturallySpeaking transcribes the voice (in the author's PC) or the voice recording (in the transcriptionist's PC) with an accuracy of 97% or higher.

Transcription AID plays the voice recording in synchronization with the transcription. This allows the transcriptionists to correct the few remaining misrecognitions (2% - 3%). Transcription AID software also improves the Speech Files of the author with each correction, increasing the accuracy of transcriptions even further.

Transcription AID is the ideal solution for improving productivity within corporations and public administrations. It changes the entire speech recognition equation. Now, Nuance's Dragon NaturallySpeaking plus Transcription AID equals increased accuracy AND increased productivity for everyone. By integrating the job of improving the speaker's speech recognition profile into normal administrative workflow, jobs are protected at the same time productivity is vastly improved.

Additionally, Transcription AID makes it possible to delegate the task of improving the Dragon user's speech profiles, without the user even being there. By separating dictation, transcription/correcting, and self-learning, each task is put where individual skills and computing power are maximized.

The transcriptionist simply reads the file transcribed by Dragon NaturallySpeaking Professional with the Transcription Aid interface. Whenever an illogical word or phrase due to false recognition occurs, a quick press of the foot pedal, function key, or mouse-click enables the secretary to hear the pronunciation of the person that dictated it in perfect synchronization with the transcription. In this way, the secretary can correct and improve the user's speech profile all at the same time.

Transcription AID® Software Versions:

- **Transcription AID® V4.0 is Compatible with Dragon NaturallySpeaking® V9**
- **Transcription AID® V3.6 is compatible with Dragon NaturallySpeaking® V7 & V8**

NUA-G909AG0010.3
IBM ViaVoice® Pro USB Edition®

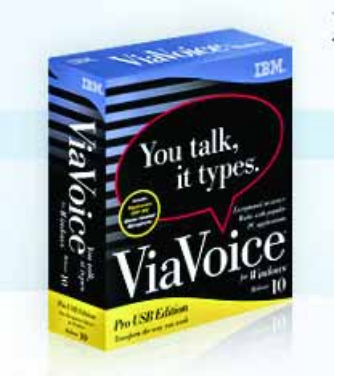
You talk, it types

IBM ViaVoice Pro USB Edition is the flagship offering of the ViaVoice for Windows, Release 10 product line. It represents the merger of high-productivity software with advanced microphone technology. Pro USB Edition offers great dictation versatility; dictate, edit, and correct text in SpeakPad, the resident speech-enabled word processor, or in Word, Excel, and other applications within the Microsoft Office product suites, including Office XP, or directly into a variety of other PC applications. Pro USB supports Windows XP Professional and Home, Windows 98SE, Me and 2000 operating systems.

Pro USB Edition expands the usefulness of the powerful Navigation Macro Center found in earlier generations of IBM ViaVoice for Windows. With Pro USB, users can create macros that will run across multiple applications. In addition, users can now control the speed at which their macros run.

Pro USB Edition supports the use of select digital handheld recorders.

Pro USB Edition is the IBM desktop voice recognition product that features IBM ViaVoice Documents -- Microsoft Word-based customized templates for letters, reports, faxes, e-mails, and VoiceMarks, which can read the name of a customized navigation macro to the user as an audio confirmation that the macro is being run correctly.



List $189.99

Key Benefits

- ***Noise-cancelling USB headset microphone included***
- ***IBM® ViaVoice® Documents and Voice Marks***

Dictaphone

List $349.00

- Walkabout Write combines desktop voice file management software with an integrated PC-connected transcription module, ergonomic headset, and playback foot control.
- Walkabout Write transcription software makes it easy to identify individual voice files, locate author priorities, and organize dictation.
- Voice playback begins with a touch of the foot pedal - or a mouse click - while automatically launching the desired document processing software or template.
- Transcription module offers adjustable headset volume, tone control, and the ability to switch between headset or external speaker playback.
- Walkabout Write software lets you easily return the original voice file and transcribed text file to the dictating author via e-mail or network exchange.

DTP-OPSHM02

PowerMic™ II Speech Recognition Hand Microphone

The Dictaphone PowerMic™ II from Nuance is specially designed for enhanced physician productivity, providing ergonomic control of both standard dictation and speech recognition functions. The PowerMic II microphone offers simplified single-handed, thumb-control operation for dictating, navigating, reviewing, and editing speech recognition generated documentation.

Full Dictation Control

The PowerMic II advances physician PC dictation, making it easier and faster to control voice recording, navigate and select fields in on-screen templates and standard reports, and move throughout recognized text reports for review and editing. In addition to complete dictation control, the PowerMic II incorporates full-function, Microsoft® compatible, PC-Mouse capabilities into the hand microphone, to reduce the need for care givers to have to continually move between the microphone, mouse, and keyboard. With the PowerMic II, users have the ability to rapidly navigate report template fields, then record and use "voice fill-in" capabilities to insert recognized text into report template fields. By combining an ergonomic hand microphone with PC mouse functions, physicians will gain new levels of dictation speed, ease-of-use, and productivity.

- USB connectivity for easy plug-and-play installation and transporting as well as elimination of need for sound card enabled PCs.
- Integrated Barcode Scanner (optional model) for entering MRN, accession number, or other barcode-driven data, with audible feedback upon successful barcode scan.
- Includes new, wall-mountable, microphone holder.

List $495.00

OLY-ME30W

Compatible with DS-30/40/50 Series

Microphone Kit

2-CHANNEL PROFESSIONAL MICROPHONE KIT (Digital Stereo Conference Recording)

- Two Microphones: The Digital Conference Microphone Kit comes standard with two right and left channel omnidirectional microphones so you can record all the audio you want, from pretty much wherever you want.
- Cover the Area: The right and left channel microphones may be placed up to 5 m (16 ft.) apart, suitable for conference recording in large rooms so you can record audio from multiple directions to ensure you never miss a beat.
- Transportation and Protection: The kit and all its components fit perfectly into slots of case for easy portability and secure handling.
- Employs a low noise, high quality microphone element covering a 20 Hz - 20,000 Hz frequency bandwidth, and can therefore be used for recording musical performances as well as conferences.
- Left/Right channel playback (separately or simultaneously)
- Can be attached to the foldable mini tripod (TR1) stand adapter and placed on a conference table.
- Compatible with the Olympus DS-50, DS-40, and DM-30 digital voice recorders
- Streamline transcription tasks with the Olympus AS-4000 Transcription Kit or AS-2300 Transcription Kit
- Audio is recorded in high-quality Windows Media Audio (WMA) file format
- Capture, store, and transfer hours of recordings (available hours vary depending on xD-Picture Card capacity used with compatible voice recorder)
- Conference Microphones ME30W

List $349.99

Package Contents

OLY-DS4000

Professional Hand Held Digital Voice Recorder

One of the best Digital Voice Recorders currently available, the Olympus DS4000 comes packed with many features to put itself above the competition. Its elegant design and compact body make it perfect to carry in your pocket. Record more than 11 hours of superb quality DSS audio with the included 32MB xD-Picture Card and up to 179 hours, 30 minutes with a 512MB card. Also, the Slide Switch Operation is quiet and easy to use, resulting in high performance, comfort, and increased productivity. It's difficult to imagine a more complete digital voice recorder for your professional needs. The powerful DS4000 includes a USB docking station for recharging of Ni-MH battery pack and downloading data to a PC. When connected to a computer, the DS4000 can be utilized as a USB speaker and microphone (when using voice recognition software) and also The DS4000 will automatically synchronize its clock with your PC using the DSS Player Pro Dictation software. An easy-to-read backlit LCD display also allows you to use the recorder even in low-light conditions. With more than 11 hours of DSS recording capacity available, 7 separate folders for organizing your voice files (199 files per folder), and noise canceling technology for clearer sound, the DS4000 is a powerful addition to any digital recording library.

- Comes with 32MB xD memory card, provides up to 660 minutes of recording time (in Long Play mode; 310 minutes in Standard Play mode)
- USB docking station to connect directly to a PC or Mac
- Compatible with popular digital speech recognition (speech to text) packages, such as Dragon Naturally Speaking and IBM Via Voice
- Files can be outputted as .WAV and/or .DSS compressed digital speech format.
- Elegant design and compact body
- DS4000 and DSS Player software are PC and Mac compatible
- Separate folders let you store, transfer, and organize your files (199 files per folder)
- Noise canceling technology
- Backlit LCD display
- Connect the DS4000 to a computer and use it as a USB speaker to output audio or as a USB microphone when using voice recognition software
- Includes a built-in Variable Control Voice Actuator that automatically starts and stops recording as it senses sound, helping to conserve memory and battery life
- Insert up to 16 index marks per recording to quickly identify important dictation
- Move, Erase, Overwrite, and Lock audio files
- Use the Alarm Playback function to play a selected file at a pre-set time
- Included are 32MB xD Card, Docking Station with recharge function, Rechargeable Battery Pack, DSS Player Pro Software, AC Adapter, USB download cable and case.
